The Primary Investigator for this study is:  
Dr. Wen Liu, PhD

We are recruiting candidates, and encourage females and minorities to apply.

**Do you have problems with your balance?**

**Do you have an Inner Ear or Vestibular Problem?**

**If yes, KUMC is conducting a research study you may be interested in!**

KUMC is looking for  
volunteers  
to participate in a research  
study for

*People with Balance  
Problems due to an  
Inner Ear or  
Vestibular Problem*

This study will investigate a  
system that may help people  
improve their balance.

## **Study Criteria**

- Diagnosed with unilateral or bilateral vestibular dysfunction for at least 3 months.
- 18-79 years old
- Ongoing balance problems.
- Completed Vestibular Therapy.
- No history of seizures.
- No current oral health problems.

## **Study Information**

- The study is testing the efficacy and safety of the BrainPort balance device.
- You will be randomly assigned to one of two groups.
- You will participate in 6 clinic training sessions.
- After clinic training, you will use the device at home for 2-20 minute sessions every day for 7 ½ weeks.
- Total study duration is 8 weeks.
- We will assess your balance at the beginning of the study and at the end of the study using standard balance tests and questionnaires.
