

Research Seminar Series in Cancer & Developmental Biology

Fall 2009 Schedule

8:45-9:45 a.m. - Lied Auditorium, KUMC Campus

DATE	SPEAKER	SEMINAR TITLE
8-27-09	Sheng Ding, Ph.D., Scripps Research Institute	A Chemical Approach to Stem Cell Regulation
9-3-09	Helen Piwnica-Worms, Ph.D., Washington University	Targeting Cell Cycle Checkpoints in Breast Cancer
9-10-09	Samuel Weiss, Ph.D., University of Calgary	Adult Neural Stem Cells: From Basic Science to Therapeutic Applications
9-17-09	Daniel Medina, Ph.D., Baylor College of Medicine	New Approaches to the Study of Human Ductal Carcinoma In Situ
9-24-09	James Palis, M.D., Univ. of Rochester Medical Center	Ontogeny of Hematopoiesis: Child Labor in the Mammalian Embryo
10-08-09	Harold L. Moses, M.D., Vanderbilt	TGF-Beta Regulation of the Tumor Microenvironment
10-15-09	Richard M. Schultz, Ph.D., University of Pennsylvania	From Egg to Embryo: A Peripatetic Journey
11-05-09	Anthony N. Imbalzano, Ph.D., University of Massachusetts	Epigenetic Control of Gene Expression and Higher Order Gene Structure
11-12-09	James Bieker, Ph.D., Mount Sinai School of Medicine	Probing the Onset and Regulation of Erythroid Cell-Specific Gene Expression
12-03-09	Frank Pugh, Ph.D., Penn State	Genome-Wide Interplay Between the Gene Regulatory Machinery and Chromatin
12-10-09	Alain Nepveu, Ph.D., McGill University, Montreal, Qc	Implication of the CUX1 Transcription Factor in Cell Cycle Progression, Mitotic Checkpoint and Cancer

Sponsored by the Institute of Maternal-Fetal Biology, Dept. of Pathology & Laboratory Medicine, Kansas BIRCWH K12 Program, Kansas Cancer Institute, & the Peter T. Bohan Fund

**IMFB - Institute of
Maternal-Fetal Biology**

**THE UNIVERSITY OF KANSAS
MEDICAL CENTER**

Peter T. Bohan Fund
