**Pharmacies provide expertise, convenience**

Expert service. Convenient locations. Excellent value. These words describe The University of Kansas Hospital outpatient pharmacies, located across the Kansas City area.

With a newly opened location at the Richard and Annette Bloch Cancer Care Pavilion in Westwood, Kan., customers now have another option in meeting their medication needs. This pharmacy offers a full range of prescription services and over-the-counter drugs Monday-Friday.

“Our pharmacies are a lot like small-town drugstores in that we provide outstanding personalized care,” said Rick Couldry, RPh, Pharmacy director. “In addition, we have the expertise to handle the most complex, unique medications like chemotherapy treatments.”

**Expert service and quality care**

Our physicians, pharmacists and other healthcare providers work together to develop the best medication plan for each patient. The staff studies each patient’s medication history for potential side effects and makes alternate recommendations. This extra step ensures continued safe, quality care.

The specialty pharmacy team members also provide products with limited availability, such as oral cancer and transplant medications. They offer ongoing consultation regarding these and other complex medications.

**Convenience at multiple locations**

The hospital staffs four pharmacies across the metro, providing convenience for our patients. By having pharmacies in our clinics, patients avoid another stop to fill prescriptions.

Other conveniences at the main hospital pharmacy include refilling prescriptions by phone or email. Patients may call 913-588-2561 or email myPharmacy@kumc.edu for refills. Complimentary home delivery also is available. All our pharmacies offer a wide selection of over-the-counter medications, vitamins, minerals and natural supplements.

Customers may also move their prescriptions from one hospital pharmacy to another that is more convenient. They simply need to call the pharmacy where they would like to pick up their prescription and ask that it be transferred to that location.

**Excellent value every day**

The hospital debuted a $4.99 Generic Drug Program in July. The new pricing program includes hundreds of generic drugs used to treat a wide range of conditions, such as diabetes, cholesterol, blood pressure, arthritis and pain, and many more. Anyone may purchase these medications at the Westwood, Lee’s Summit and Overland Park locations.

Only patients of our physicians can take advantage of this program at the main hospital pharmacy.

Our team of pharmacists and pharmacy technicians is committed to providing the most convenient, safest prescriptive care possible. The patients who filled more than 130,000 prescriptions at our pharmacies in 2012 are testament to the quality and service we provide.

**Why would you go anywhere else?**
