The University of Kansas Hospital now offers access to multiple surgical specialties, services and coordinated, compassionate care in Overland Park at its Indian Creek Campus. The campus is located off I-435 at the Nall Avenue exit.

The University of Kansas Hospital – Indian Creek Campus
The hospital features 20 pre- and post-operative rooms and seven state-of-the-art operating rooms. Patients needing overnight care can rest easy in one of the hospital’s 19 large private patient rooms. The hospital also offers 10 short-stay rooms for outpatient care.

Marc A. Asher, MD, Comprehensive Spine Center
We are a part of the area’s most comprehensive spine care program in greater Kansas City. Comprehensive care from a multidisciplinary team provides relief and support to patients suffering from a variety of types of pain, including hip, joint, knee and back. Physicians also treat patients with musculoskeletal injuries, tumors and spinal disorders. The office is in Building 10730, Suite 200.

Center for Sports Medicine
The Center for Sports Medicine specialists provide advanced, comprehensive care for all types of sports injuries. This multidisciplinary approach includes the latest in diagnostic imaging, surgical and nonsurgical care options, follow-up evaluation and physical medicine and rehabilitation. We offer the same sports medicine team that treats professional athletes. The office is in Building 10730, Suite 200.

Sarcoma Center
The Sarcoma Center brings together the region’s premier multidisciplinary team to provide comprehensive care and treatment to adult and pediatric patients. A multidisciplinary team treats uncommon bone and soft tissue tumors and other aggressive tumor-like conditions. Limb preservation techniques are also used to eradicate the cancer with preservation of life, limb and function. The office is in Building 10730, Suite 201.

Indian Creek Specialty Care
Indian Creek Specialty Care currently offers the largest group of board-certified general neurologists. As part of The University of Kansas Hospital’s Center for Advanced Brain and Neurological Care, these neurologists provide world-class treatments for adults with disorders and conditions that affect the brain, spinal cord, nerves and muscles. The office is in Building 2, Suite 140.

Women’s Health Specialty Center
Comprehensive services for women of all ages include the most advanced diagnostic and surgical procedures. The center is located in Building 2, Suite 200.

Plastic Surgery
Plastic surgeons perform the full scope of reconstructive procedures, including breast augmentation, breast reconstruction, hand surgery, liposuction, facelift, brow...
lift, eyelid surgery, skin cancer removal, extremity replantation surgery and more. We also offer many popular nonsurgical aesthetic treatments, including injectable fillers, chemical peels and laser treatments. The clinic is in Building 2, Suite 210.

Breast Surgery Center
The Breast Surgery Center is part of the comprehensive breast program at The University of Kansas Cancer Center and offers the largest and most experienced group of breast surgeons in the region. Our specialists diagnose and treat breast cancer in a team environment to ensure the best and latest patient care. The center is located in Building 3, Suite 220.

Mid-America Cardiology
Heart specialists provide leading-edge prevention, diagnosis, treatment and follow-up care. Our specialists are ranked among the Top 50 best hospitals in the nation for heart care. Same-day appointments are offered, as available. The clinic is located in Building 3, Suite 300.

General Surgery
Surgical specialists provide advanced, comprehensive care to patients. We are leaders in adopting new treatment techniques and offer a wide range of minimally invasive procedures, providing patients a quicker recovery time and return to daily activities. The clinic is located in Building 3, Suite 300.

Medical Plaza Internal Medicine
Expert care for adults and adolescents includes prevention and wellness education, and chronic condition management. The clinic is located in Building 3, Suite 310.
