

## A work in progress

### Construction means new routes for patients and employees

Construction of the new Medical Office Building is officially under way. And with construction, it is necessary to reroute foot traffic around the Miller building.

Offer your assistance if you see visitors who appear lost. If they want to enter the Miller building, direct them to the hallway just past the main elevator lobby.

Instruct them to follow the hallway, through the tunnel, to the Miller building (map below).

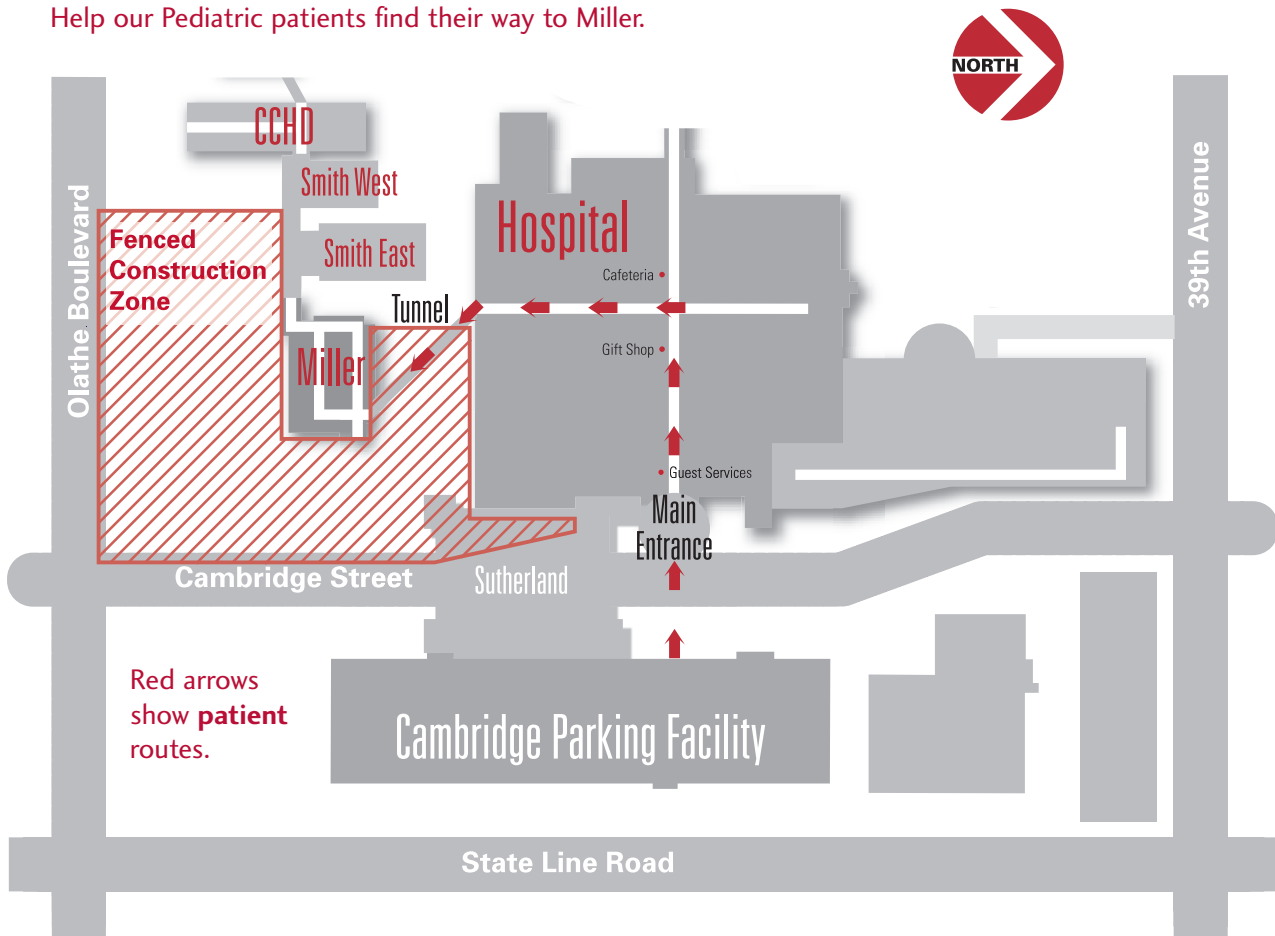

The tunnel connects to a Pediatric clinic in Miller.

Out of respect for patient quality, general employee foot traffic through the clinic is discouraged.

routes.

*continued from front*

from the Olathe Parking Facility and the hospital should use one of these primary routes (map above):

- Walk outside along the east side of Cambridge Street and the south side of Olathe Boulevard. (For safety reasons, don't walk

on the construction side of those streets.)

- Walk west from the hospital, through Eaton, Delp and out through the Olathe Pavilion.
- Starting Aug. 15, an exterior pathway connecting to the hospital's south entrance will reopen. The

path runs between the Olathe Pavilion and Center for Child Health and Development (CCHD) and continues to Olathe Boulevard.

Note: Please avoid using the outdoor walkway between the hospital's south entrance, through the

garden and connecting to the Miller and Smith buildings. The garden is a visitor and patient area. As with the Pediatrics area in Miller, please respect patient privacy.
