

### **Honoraria for protocol-specific monitoring body members**

The principal investigator is responsible for paying an honorarium to the protocol-specific monitoring body members. Based on the current honoraria rate paid by NIH for study section members, the DSM-EC has set a rate of \$250 per review for protocol-specific monitoring body member. Total costs for each monitoring review are thus dependent on the number of monitoring body members.

Determining a method of payment is the responsibility of the principal investigator. Depending on the payment process, a KUMC Contractual Services Form may be required. That form can be found at <http://www2.kumc.edu/finance/pdf/StateContractualServicesForm.pdf>.
