

## 2009 Faculty Research Day and Poster Session

**To: All Faculty, Kansas City and Wichita**

**From: Gregory S. Kopf, PhD, Associate Vice Chancellor for Research Administration**

Faculty Research Day is a great opportunity for our faculty to showcase their research programs, as well as to encourage new ideas and collaborations. The Faculty Research Day Poster Session displays are a wonderful addition to this program, as these posters keep our community of researchers informed of recent developments in all aspects of research at the University of Kansas Medical Center, Kansas City and Wichita. The Faculty Research Day program in the School of Nursing Auditorium (G013) will begin on **Tuesday, November 3, 2009, at 12:00 PM**, time is subject to change (Note that lunch will not be provided this year).

Our hope is that each faculty member who is currently engaged in performing research would present a poster. Posters that have been or will be presented at local, national or international meetings are entirely suitable. We will furnish you with a freestanding display board 4' x 8', with assigned numbers. The posters will be on display November 2<sup>nd</sup> – 4<sup>th</sup> in the Kansas Life Sciences Innovation Center, Beller Conference Center.

To participate in the Poster Session we ask that you please send your poster title, list of authors with departments represented **on or before September 15, 2009** to:
