

All-

The date is set (May 15) and the race is on--it's RESIDENT AND FELLOW RESEARCH DAY. We will again this year have an all day session for resident presenters and a half day session for fellow presenters. The talks are 10 minutes with 5 minutes Q&A. Each department is to have one resident do an oral presentation (medicine gets more because they have so many residents). We will try to schedule around clinical duties. We have an oral session for the fellows, and we will try to accommodate as possible. There will also be poster sessions for each, and again we will try to accommodate as many as possible. There are cash awards for each category, but more importantly, this makes research a greater priority. Every department can show evidence of research at site visit time (something near and dear to me right now). AND it gives credit to the residents for the research they do. So please email Kelly Robertson (krobertson@kumc.edu ) in Dr. Terranova's office or myself if you can't remember Kelly and let us know who is presenting and their title. We will also need (by the 15th of April) a SHORT abstract yes even for the posters-- to publish in the research day brochure. Thank you all for participating and especially for those of you who have already turned in your names.

Thank you,

B Vail
