C. Research Support

Ongoing Research

Bott (PI)

07/01/2006-06/30/2008

Kansas Department on Aging
Kansas Nursing Facility Project

The purpose of this study is to evaluate the relationship between facility characteristics (e.g. staff turnover, ownership status, urban/rural location, management/leadership education; number and type of survey deficiencies) and resident care and health. This is a 3-year project, renewable on a yearly basis.

The Impact of Quality End-of-Life Care in Nursing Homes

The study will examine key organizational structures and processes (leadership, communication, teamwork, palliative care) and their impact on the quality of end-of-life care for dying residents and their family members.

Role: Co-Investigator

Dunton (PI)

01/01/2006-12/31/2010

American Nurses Association

National Database for Nursing Quality Indicators

The National Database of Nursing Quality Indicators is established and maintained to: (1) provide benchmarking information on nursing-sensitive indicators to acute care hospitals for use in their quality improvement initiatives; and (2) monitor local and national trends in hospital nurse staffing to facilitate the American Nurses Association's *Patient Safety, Nursing Quality* initiative.

Role: Center Scientist
